PROFILE SUMMARY

I am an aspiring Artificial Intelligence and Data Science student, eager to leverage my machine learning, data analysis, and problem-solving skills in real-world applications. With solid academic grounding and practical project experience, I aim to contribute to innovative solutions while continuously expanding my expertise in the field.

EDUCATION

Btech in artificial intelligence with Data Science GPA : 7.0/10	NOV2022-PRESENT
Narayana Junior College	JUN2020-
Pre University – Science Percentage: 70%	MARCH2022
Mangal Vidyalayam(CBSE) B - grade	2019-2020

PROJECTS

TITANIC SURVIVAL PREDICTION:

In this project I used Machine Learning to predict whether a passenger survived or not based on various features like age, gender, class, and fare. This is a classic binary classification problem involves preprocessing, feature engineering, model building, and evaluation.

PARKINSON'S DISEASE PREDICATION:

Developed a Parkinson's Disease Prediction model using Python and machine learning algorithms for early detection. Performed data preprocessing and evaluated model performance using standard classification metrics using CNN models.

TECHNICAL SKILLS

Programming Languages: Python, Java, R language.
Frameworks & Libraries: OpenCV, PyTorch, Pandas, NumPy, Matplotlib, Seaborn.
Machine Learning & Deep Learning: scikit-learn, pandas, cnn, knn.
Database Management: MySQL, MongoDB, Excel.

CERTIFICATIONS

- NPTEL : The joy of computing using python.
- Machine Learning : Prinston Smart engineers.
- Deep learning : Rakshanth technologists Pvt.
- Python : Code Genuis innovations
